ET-1 Ext Tally Indicator

IF-xxx Camera Interface Cable

Jibcom is the ultimate solution for remote intercom, tally and external viewfinder switching for the jib mounted camera.

Jibcom's individual controls for the camera's prod and eng channels plus program audio, feature digital volume and panning that allow the operator to mix and pan signal sources as desired. Intercom mic on-off and three external viewfinder select buttons feature Twecomm's "Smart Touch" technology providing either momentary or latching function. LED's indicate when functions are activated.

Jibcom provides bright red and green tally LED's on the control head. A connector is provided for the optional ET-1 external tally indicator which provides an additional external tally indication which can be located at the operators video monitor. Another external tally connection is available on the interface module to provide tally for a jib mounted prompter.

Jibcom consists of the IF-100 camera interface, CH-200 control head, and standard 40 ft. jib arm interconnect cable. The operators control head is furnished with a robust swivel-tilt mounting clamp for fast easy setup. Power for Jibcom is derived from the camera. Connection to the camera is made with brand / model specific Jibcom interface cables.

- Two Channels Of Camera Intercom *
